SPAWN
d@gm Company

Our Company

D@GM is a Design Consultancy that specialises in market innovations. We have two divisions to our business; Product and Building Development, New Business Development, which forms part of D@GM. Our second part of the business is Spawn Products which markets products into Australia that capitalise on niche overseas supply issues.

Technical Director; Greg Meyer has always insisted on the philosophy of Australian Made and Designed throughout his professional and corporate career. This is because he believes strongly in developing intergenerational businesses for the local village first to thrive from, then assisting it in leveraging growth from the rest of the world. He has been involved in retail, consumer, household, building services, industrial, defence, banking, security, processing, mining and leisure industries as a product developer, marketer, business development manager and business to business sales engineer. His hunters mentality is installed into the mindset of his own team. The reason is that business is now global and highly competitive. As a result, we chase down opportunities and convert them into long term business returns for our clients and thus ourselves.

Through many years of experience, we can quickly identify potential growth areas in your business. Greg has a trained team of professionals to fall back on for added depth to solve your problems. We understand that your company will be driven by your own innovations, and this aligns with our ethos.

Our markets include mining, electronic security, defence, building materials and medical products. As you can see, we have experience and knowledge in many different fields.

Our Products

Product niche's we currently take advantage of in Australia are:

Electronic Security

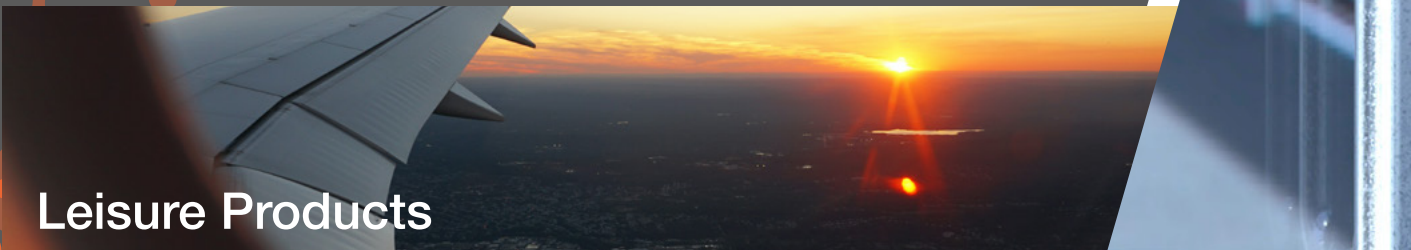

ABI Electronics

Mining, Agriculture and Transport

Building Design

Leisure Products

SPAWN

d@gm Company

Our electronic security products are designed with user experience in mind, while addressing the demand to lower maintenance costs in replacing expensive security technologies. Technologies include CCTV cameras, Biometric scanners and Door Controller and Intruder Panel PCB's.

Door Controller Rack System:

Starting at: \$1698.00 (Negotiable)

The Universal Door Controller Rack Mount is a centralised mounting system that creates a neat array of 6x boards (2-4 doors). This system is easy to access for electronic security technicians. There's also switch and battery backup locations, and it also allows temperature control. Furthermore, the individual cable management features improve the usability upon installation and organisations of cabling. Contact us for a quote or more information regarding this product.

Biometric Reader Shroud:

Starting at: \$1,655.00 (Negotiable)

Low Cost Version Starting at: \$1,100.00 (Negotiable)

The ruggedised Biometric Reader Shroud is designed to vandal proof expensive and often delicate off the shelf Biometric readers. Constructed from stainless steel and utilising snake eye security fixings, the shroud is not only secure but also virtually indestructible. It's also weather and dust proof due to gasketing with the benefit of UV proofing your plastic biometric reader therefore extending its service life. Contact us for a quote or more information regarding this product.

PTZ CCTV Shroud:

Starting at: \$3,750.00 (Negotiable)

The ruggedised PTZ Shroud is designed to be UV and bird proof minimising maintenance to save ongoing costs. The design is easy to fit with minimal on-site assembly for the contractor. The light weight composition means less structure and easy installation. Our Acrylic Shroud allows for full 360 degree vision and no distortion of image. Toughened plastic material composition makes it vandal proof and bird proof. Contact us for a quote or more information regarding this product.

Fixed CCTV Shroud:

Starting at: \$1,650.00 (Negotiable)

The ruggedised CCTV Shroud for any fixed Camera range, is designed to provide UV and bird proofing while offering a durable plastic structure that is easy to access for maintenance. The design is easy to mount and maintain. Contact us for a quote or more information regarding this product.

Rack Sliding Base:

Starting at: \$195.00 (Negotiable)

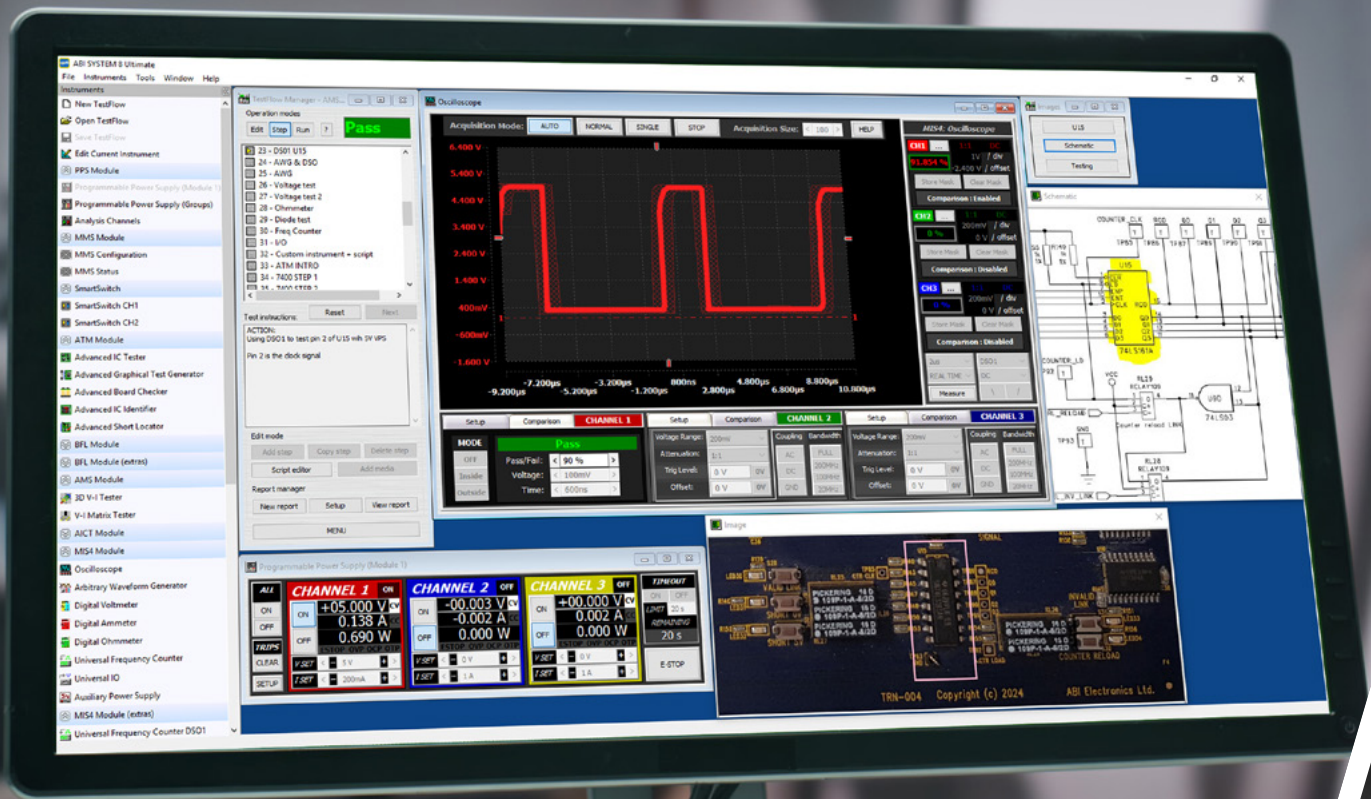

Designed to use with many rack series, this smart rack saves tour back and neck by giving you easy access to equipment when installing it into a cabinet. Contact us for a quote or more information regarding this system.

Open 12RU Cabinet Racking:

Starting at: \$185.00 (Negotiable)

Provides the perfect mounting option for smaller Audio/Video and IT equipment where space is limited and a full sized cabinet is not required. Contact us for a quote or more information regarding this system.

We have partnered with ABI Electronics to be an authorised reseller to Defence and Aerospace SMEs in Australia.

Established in 1983, ABI Electronics Ltd is the world's leading supplier of specialist electronic test and measurement equipment, and is known for technological advancements such as the BoardMaster, the JTAGMaster and the SENTRY Counterfeit IC Detector plus the launch of the 'Repair, Don't Waste' movement.

Mining, Agriculture and Transport Parts

We specialise in the design of gaskets, bearings, hatches, simple system improvements, wear strips, chutes, sight glasses and more including replacement parts required to maintain equipment in the Mining, Defense and Processing Industries.

Wash Plant Pump Motor Guards:

Starting at: \$5,000.00 (Negotiable)

Pump Guards reduce maintenance costs and reduce the damage to the motor and pulleys. Lightweight, UV stable, designed for ease of access and installation. Guards protect workers or operators from moving parts or high voltage power and corrosion resistant. Contact us for a quote or more information regarding this system.

2 Port Conveyor Switch Covers:

Starting at: \$2,000.00 (Negotiable)

Conveyor Switch Cover reduces maintenance costs and damage to the switch. Lightweight, UV stable, designed for ease of access and installation. Product protects workers or operators from moving parts or high voltage power and corrosion resistant. Contact us for a quote or more information regarding this system.

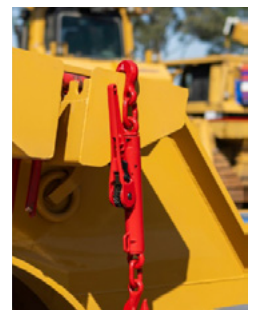

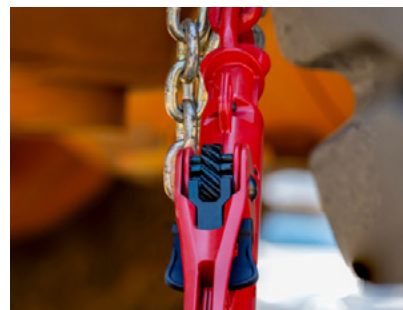

AutoMap VellusX

Contact us for a quote for this product

The world's most accurate SLAM mapping system. A compact, lightweight sensor pack that fuses WildcatSLAM odometry with RTK-GPS. Walk it, drive it, or place it on a robot to capture survey-grade coloured maps over long distances and across S-denied environments.

Built with CSIRO's prize-winning WildcatSLAM odometry engine and vigorously tested across a wide variety of survey applications. An automatic processing pipeline adjusts sensor weights to maintain global accuracy, seamlessly transitioning between GPS-available and GPS-denied spaces to create sharp, accurate 3D maps.

VellusX is the only available SLAM solution to produce globally accurate maps using PPK GPS: download base-station RINEX files to retrospectively realign SLAM maps on-device in a seamless workflow — no survey control required to guarantee mobile SLAM accuracy. Travel at driving speeds to capture cityscapes, urban streetscapes, and large outdoor environments in dense, full-colour detail.

Universal Bulldog Binder®:

Contact us for a quote for this product

The game-changing ratchet binder that brings a new level of efficiency and safety to cargo securement. Designed with innovation and practicality in mind, its standout feature is the direct line ratchet motion of the handle providing increased torque load, and prevents your chains from twisting while tensioning, preventing the chain from

becoming loose. Another key safety and security feature is the ability to "Lock to Load" the binder via our unique internal locking mechanism. This provides added security that your equipment is safely secured by the Bulldog Binder®.

After securing the load, use the Bulldog Binder® lock to ensure the safety of your cargo. This lock provides an additional layer of protection against tampering, giving you peace of mind that your cargo will remain secure throughout transit.

In a compliance rich environment, it is important to be aware of the constant changes to the Building Code. The Australian building industry is one of the most competitive in the world, so we take great pride in having successfully rolled out design registered cladding systems and commercial fit-out products that fulfill the demanding requirements of modern building specifiers.

Next Gen Whirlybird

Soon to be released

This Whirlybird specialises in maintaining heat in your roof space during winter and releasing heat during summer, with a specially designed gear that self manages to the current ambient temperature outside.
